

ECO₂ Series

CO₂ Charge Protector™

Protect your charge during power outages and service events.

CO₂ Charge Protector™ works by detecting a pressure increase in the system and circulates the flash gas tank vapor through the the condensing unit.

Start-up seamlessly after down-time!

- CO₂ Charge Protection™ cools the CO₂ in the flash gas tank
- Protects CO₂ in the flash tank from expanding or releasing during power outage
- Typically will fit within the rack system but based on compressor selection
- Factory installed on new systems
- Contains less than two pounds of charge
- Wire the unit to the store's auxiliary power
- Readily powered by a battery back-up uninterruptible power supply (UPS) system
