

Refrigeration Systems

Multiple Compressor Accessory Series

Condenser Assembly

This condenser assembly makes an excellent companion to our Distributed Scroll System (DSS).

The assembly can be configured with the options you need. Shown here with dual pressure relief valves, a drop leg inlet pressure regulator, a receiver pressure regulator, a multiple replaceable core filter drier, a sight glass, two access flanges for receiver level monitoring devices and numerous isolation full port shut-off valves.

All joints are brazed with a high silver content brazing alloy while dry nitrogen flows through the tubing.
